

Gonzalo Mancebo

👋 Hello! I am a Web Software Developer currently training to become a Full Stack Developer. I have experience in developing web interfaces with React, building mobile applications using React Native, programming in JavaScript for front-end projects, and integrating APIs and web services. I am studying backend development to enhance my skills and looking for opportunities as a Web Developer, Mobile App Developer, or Junior Full Stack Developer. My goal is to lead comprehensive web and mobile development projects in an innovative tech company...

EXPERIENCE

Clayton Hotel Burlington Road / Dublin, Ireland — Purchasing Assistance

July 2022 - PRESENT

- Assisted the Purchasing Manager in managing warehouse operations, including inventory control, organization, and logistics coordination.
- Oversaw inventory control measures and maintain organized warehouse spaces to optimize efficiency and accessibility.
- Reviewed incoming deliveries, ensured their accuracy, and accepted them into inventory according to established protocols.
- Facilitated communication with other departments to assess stock availability, anticipate demand, and resolve supply chain issues promptly.

Harvey Norman / Dublin, Ireland — Warehouse Operative

September 2023 - November 2023

- Provided customer assistance by resolving inquiries, offering product and service information, and addressing customer needs..
- Organized product placement on shelves according to a planogram, ensuring attractive presentation and easy access for customers.
- Prepared orders for shipment by gathering products, verifying accuracy, and securely packing items for delivery.
- Managed inventory levels, conducted cycle counts, and assisted in restocking to maintain accurate and up-to-date inventory records.
- Operated a Richie truck to transport goods safely and punctually, adhering to traffic regulations and delivery schedules.
- Performed various warehouse duties including goods receiving, storage organization, product labeling, and maintaining cleanliness.

Epson Latin/ Buenos Aires, Argentina— Office Administrator

September 2021 - December 2022

- Managed the processing and dispatching of purchase orders to suppliers, ensuring timely and accurate transactions.
- Engaged in proactive communication with other departments to enforce procurement policies and facilitate their integration into organizational processes.
- Monitored the workflows of purchase requisitions to ensure smooth and efficient processing, addressing any bottlenecks or delays as needed.
- Assisted in the preparation of tender documents and other procurement-related tasks to support the procurement process.
- Responded to inquiries and resolved problems related to procurement processes, ensuring seamless operations and customer satisfaction.
- Collaborated in the implementation of new computer systems for the procurement/facilities department, providing support and expertise to ensure successful integration and utilization.

Linser SACIS / Buenos Aires, Argentina— Human Resource Administrator

January 2020 - August 2021

- Supervised, planned, and coordinated operational teams to ensure smooth workflow and optimal productivity.
- Streamlined documentation processes to enhance efficiency and accuracy in record-keeping and information management..
- Efficiently coordinated with suppliers to maintain positive relationships, ensure timely deliveries, and negotiate favorable terms.
- Managed comprehensive employee databases, including personnel records, schedules, and performance evaluations, to facilitate effective HR management.
- Proficiently processed and organized supplier invoices, ensuring accuracy and timeliness in payment processing and financial record-keeping.

PROJECTS

Order Now

URL: <https://order-now-sigma.vercel.app/>

Technologies:

- FrontEnd: React, Next.js
- Backend: Firestore for data management

Project Summary:

- **Project Type:** Order management and operations monitoring application.
- **Purpose:** To facilitate simultaneous work among different types of users through a dynamic interface and efficient data management.
- **Role in the Project:** Developed the user interface using React and Next.js, integrated Firestore for authentication and cloud data management, and supervised the platform's functionalities.

Portfolio

URL: (Add the link to your portfolio if it's available online)

Technologies:

- Frontend: React.js, Next.js, Tailwind CSS
- Deployment: Vercel

Project Summary:

- **Project Type:** Personal portfolio website.
- **Purpose:** To showcase personal projects, skills, and achievements in a clean, modern, and responsive interface.
- **Role in the Project:** Designed and developed the portfolio using React.js and Next.js for a dynamic, server-rendered experience. Utilized Tailwind CSS for styling to ensure a sleek and responsive design. Deployed the project on Vercel for seamless hosting and performance optimization.

ACADEMIC EDUCATION

Degree in Health & Safety
